

ReConnect China: Generating independent knowledge for a resilient future with China for Europe and its citizens

ReConnect China aims to explore the possibilities of collaboration between the EU and China in 4 strategic domains: Science & Technology, Economy & Trade, Domestic Governance and Foreign Policy. The project will raise awareness of EU-China relations among the general public and European youth by utilizing Massive Open Online Courses (MOOC), podcast series and infographics, and disseminate the research findings through policy briefs, research papers, and academic articles. The key objective is to bring together stakeholders and experts in a Europe-China Knowledge Forum to 'translate' the scientific analysis into strategic knowledge and policy impact.

Start date: 1st November 2022 - End date: 31st October 2026
